Summary

A well-established Engineering firm is looking for a Civil Engineer for their project operation - the incumbent must have experience in civil engineering and be registered by ERB as a Professional Engineer.

The civil engineer should be a critical thinker and a great problem solver. You must also possess a certain level of creativity in order to present innovative solutions and improvements to technical processes with the main of enhancing efficiency and productivity whilst managing costs. The successful candidate will be able to effectively communicate ideas, make recommendations, and negotiate project details with their team, subcontractors, and clients.

Responsibilities

- Day-to-day management of the site, including supervising and monitoring the site labor force and the work of any subcontractors;
- Planning the work and efficiently organizing the site in order to meet agreed deadlines;
- Overseeing quality control, health and safety matters on site;
- Preparing reports as required;
- Ensuring all materials used and work performed are as per specifications;
- Interpreting the contract design documents supplied.
- Developing detailed designs.
- Doing feasibility assessments and site inspections.
- Preparing and implementing project plans.
- Researching and providing estimates for projects.
- Reviewing government regulations and ordinances.
- Monitoring and optimizing safety procedures, production processes, and regulatory compliance.
- Making recommendations or presenting alternative solutions to problems.
- Confidently liaising with clients and other professional subcontractors.
- Project management duties (e.g. managing budgets, resources, and deadlines; acquiring and compiling quotes, etc.).

Education & Qualifications

- Bachelor's degree in civil engineering or related field, accredited by the Institution of Civil Engineers.
- Registration/License as a Professional Engineer is required (ERB).

Requirements

- A minimum of 10 years of industry knowledge is strongly desired.
- Knowledge of map creation software and photo imaging software.
- Familiarity with design software, such as Autodesk, AutoCAD Civil 3D, and MicroStation.
- Excellent time management, and problem-solving skills to ensure project deadlines are met.
- Leadership skills to effectively manage a diverse group of professionals working on one project.
- Great business acumen involving cost cutting initiatives and very innovative.
- Vast experience in working with multinational companies.
- Added advantage – experience in Oil and Gas Civil operations

Characteristics

- Strong analytical and critical thinking skills, with a high level of accuracy in calculations and design.
- Great business acumen involving cost-cutting initiatives and very innovative
- Vast experience in working with multinational companies
- Ability to coordinate more than one project at a time.
- Excellent command of both written and oral English Language. Good command of written and oral Swahili Language
