Summary

Enabel is the Belgian development agency. Our mission is to build a sustainable world where all live under the rule of law and are free to thrive. With our partners, we offer solutions addressing pressing global challenges – Climate Change, Social and Economic Inequalities, Urbanisation, Peace and Security, Human Mobility – and promoting Global Citizenship.

We have over 20 years' experience in areas ranging from education and health care to agriculture, environmental protection, digitalisation, employment and governance. Enabel's expertise is eagerly sought-after by partners around the globe – ranging from the Belgian government, European Union institutions, governments of other countries and the private sector. We work with civil society, research institutes as well as businesses and we foster fruitful interaction between development policy and other areas.

With over 2,100 staff, Enabel manages about 170 projects in more than twenty countries, in Europe, Africa and the Middle East.

Background

The European Union is currently implementing its new European strategy "Global Gateway", to boost smart, clean and secure infrastructure across the world, and help to tackle the most pressing global challenges, from combating climate change and improving healthcare systems to boosting the competitiveness and security of global supply chains. The programme supports smart investments in quality infrastructure, respecting the highest social and environmental standards, and is based on a win-win model rather than an extractive and debt-based model.

Given that more than 80% of Africa's trade is carried out by sea, the programme focuses on strategic corridors. One major aim of the Global Gateway Africa – Europe Investment Package is to identify and support the creation of strategic, sustainable and secure transport corridors. By investing in the infrastructure needed to easily move from place to place, these 'strategic corridors' can support value chains, services and jobs, benefiting industries and economies in both Africa and Europe.

The present Action fits within the "Trade and transport facilitation measures for Strategic Corridors in Africa" programme of the EU, intending to address both physical and non-physical barriers to trade, that have so far hampered intra-African trade and integration, and increase the efficiency of transport systems on corridors and of their management.

The Action is structured around three pillars: 1. Port Performance (Improve the performance of the Dar es Salaam Port); 2. Trade Facilitation (reduce the time and costs for clearance and transport of goods from the port) and 3. Green mobility (supporting the transition towards a low-carbon transport system of goods and people) which will be implemented jointly between Enabel and the UN-Habitat.

The Function

The **E-Mobility Expert** will report to the Trade & Transport Project Manager while working closely together with the Skilling Expert, Entrepreneurship Expert as well as other private and public partners.
