Summary

Our client is looking for motivated, dynamic, and fresh talent with an Electrical/Telecommunication & Process engineer background to join their team. This role offers a unique opportunity to gain hands-on experience and contribute to a variety of projects within our organization. The successful candidate will work closely with experienced engineers and project managers to support our ongoing and future projects.

Responsibilities

Safety and Compliance:

- Adhere to all safety and cybersecurity policies, practices, and procedures.
- Ensure compliance with technical standards and governmental regulations.

Technical Analysis and Problem Solving:

- Analyze and interpret technical procedures and equipment-related issues.
- Provide effective solutions and communicate findings to customers and management.

Reporting and Communication:

- Prepare and present detailed reports on project progress and outcomes.
- Effectively communicate results and technical information to both technical and non-technical stakeholders.

Team Collaboration:

- Actively participate in team initiatives and management meetings to help achieve project goals.
- Support project teams, including planners, coordinators, and project managers, by providing technical insights and understanding site conditions.

Scope and Time Management:

- Understand the scope of work for assigned tasks and manage time effectively to ensure timely completion.
- Maintain full traceability of work performed, including timesheets and change orders.

Training and Support:

- Assist in training maintenance and operational staff.
- Provide support and escalate any quality or technical issues encountered in the field.

Education & Qualifications

- Bachelor's Degree in Electrical Engineering, Telecommunication Engineering, Process Engineering, or a related field.

Characteristics

- Strong orientation and dedication to meeting needs.
- Ability to work independently with minimal supervision.
- Willingness to stand and walk for extended periods as required by job tasks.
- Excellent communication, with the ability to effectively collaborate with team members.
- Self-driven, with high levels of professional and personal integrity.
