## Summary

The SOC Analyst will play a critical role in the protection of Bank's information assets. This position involves monitoring, detecting, and responding to security incidents, ensuring the security and integrity of our systems and data.

## Responsibilities

- Continuously monitor security alerts and events from various security tools and systems.
- Analyze security incidents to determine their root cause and impact and recommend corrective actions.
- Lead or assist in the response to security incidents, including containment, eradication, recovery, and post-incident analysis.
- Coordinate with internal teams and external partners during security incidents to ensure timely and effective resolution.
- Document and report on security incidents, including maintaining detailed records and creating incident reports.
- Provide recommendations for improving the bank's security posture based on threat intelligence and incident analysis.
- Work closely with other members of the Information Security team to improve overall security posture.
- Provide training and awareness to staff on security policies and procedures.
- Communicate effectively with technical and non-technical stakeholders regarding security issues and recommendations.

## Education & Qualifications

- Bachelor's degree in computer science, Information Security, or a related field, or equivalent work experience.
- 2+ years of experience in a Security Operations Centre (SOC) or similar security-focused role, preferably within the banking or financial services industry.
- Strong understanding of cybersecurity principles, threat landscape, and incident response methodologies.

## Driving Licence
