Summary

The Technician: Baggage handling systems is responsible for implementing the maintenance policy defined by the Technical Director and ensuring compliance, availability and optimal operation of Mechanical systems

Responsibilities

- Perform preventive and corrective maintenance on mechanical systems and components within terminal buildings in accordance with approved manuals, procedures, and maintenance schedules.
- Identify, prepare, and ensure availability of required tools, equipment, and PPE prior to inspections, maintenance activities, and emergency interventions.
- Execute maintenance tasks in full compliance with safety standards, airport regulations, and operational procedures.
- Ensure continuous availability and readiness of tools and PPE during inspections and maintenance operations.
- Maintain accurate and timely documentation by preparing daily maintenance logs, inspection reports, and activity records.
- Submit all maintenance reports and documentation to the Assistant Engineer within the required timelines as per maintenance schedules.
- Raise timely requests for spare parts and materials, ensuring proper justification and approval from the Assistant Engineer before use.
- Ensure consistency and continuity of all assigned maintenance activities, completing tasks within planned schedules.
- Ensure strict implementation of all health, safety, and environmental (HSE) requirements during all maintenance activities.
- Communicate effectively with internal teams regarding progress, challenges, and completion status of preventive and corrective maintenance tasks.
- Propose improvements to maintenance checklists, inspection forms, and procedures to enhance efficiency, accuracy, and system reliability.

Education & Qualifications

Minimum Qualifications

- Vocational education and training certificate in Mechanical Studies.
- At least 5 years of proven experience in maintenance of electrical and electronics systems.
- Proficiency in Swahili

Preferred Qualifications

- Additional training in mechanical systems, baggage handling systems, or large infrastructure is an added advantage
- Certification or training in mechanical systems or baggage handling systems maintenance from recognized institutions or equipment manufacturers is an added advantage
- Proficiency in English is an added advantage
