## Summary

The Technician: Road Works is responsible for executing maintenance activities on road infrastructure to ensure safe, compliant, and continuous operation of facilities.

## Responsibilities

**Maintenance Execution:** Perform preventive and corrective maintenance tasks on infrastructure in accordance with maintenance plans and procedures.

**Inspection and Routine Checks:** Conduct routine inspections of runways, taxiways, aprons, and related infrastructure to identify defects or maintenance needs.

**Repair and Maintenance Activities:** Carry out repairs on pavements, markings, drainage systems, and related civil works.

**Tools and Equipment Usage:** Use and maintain tools, machinery, and equipment required for maintenance activities.

**Work Order Execution:** Execute assigned work orders and maintenance tasks as per CMMS schedules and instructions.

**Reporting and Documentation:** Record maintenance activities, inspection results, and completed tasks accurately and on time.

**Safety Compliance in Airside Operations:** Follow all safety procedures, regulations, and permit requirements during maintenance activities.

**Issue Identification and Escalation:** Identify defects, hazards, or non-compliance issues and report them to supervisors or engineers.

**Support to Emergency Maintenance:** Respond to urgent maintenance requirements and support emergency repairs to ensure operational continuity.

**Housekeeping and Site Management:** Maintain cleanliness and order of work areas and ensure proper handling of materials and equipment.

## Education & Qualifications

**Education:** Vocational training or certificate in Civil Engineering, Construction, or related field

**Professional Certifications:** Training in road safety or operations is an added advantage
